

Insurance

■ Is Dr. Hassell a preferred provider?

No, he is an *out-of-network provider* with all insurance plans. This applies to *all* health plans including Medicare. Eliminating insurance and Medicare contracts removes an extra layer of bureaucracy and regulations and allows more freedom to provide the best patient care.

■ Will insurance cover my office visit?

We can bill most health insurance plans but suggest you ask your insurer specifically about their coverage for *non-participating* or *out-of-network* providers. Some insurance companies will only accept electronic billing from providers but allow paper claims from patients: we do not bill electronically, so in those cases we can give you an itemized statement to bill them directly.

Medicare will not cover our services, nor can they be billed (see below).

■ Will Medicare cover an office visit?

Even though a large number of our patients are 65-plus, we have *opted out* of Medicare, which means that **neither doctor nor patient is able to bill Medicare**. To satisfy Medicare guidelines, patients over 65 sign a form verifying that they understand the private pay arrangement. Most Medicare supplement plans do not cover our services. If you have questions, please give our billing department a call. We are glad to help.

■ What is the cost of my first visit?

The initial appointment is \$465 after a 15% time-of-service discount. Subsequent office visits range from \$135 to \$365 (after discount), depending on the length of your visit as well as the number of issues covered during the appointment. We ask that you pay at the time of service. If you have questions, feel free to call our billing department.

Miles Hassell MD

Dr. Hassell received his medical degree from the University of Western Australia, and completed his residency in Internal Medicine at Providence St.

Vincent Medical Center in Portland and is board certified in Internal Medicine. He lives in Portland with his wife Anna and son Tor. In addition to his primary care practice, Dr. Hassell is a clinical instructor for the training of internal medicine residents and

has been chosen several times as one of *Portland's Top Doctors*. Dr. Hassell established the Integrative Medicine Program at Providence Cancer Center and specializes in evidence-based conventional and lifestyle medicine for treatment or reversal of heart disease and stroke, type 2 diabetes, and cancer prevention and survivorship. He encourages the vigorous use of nutritional and exercise interventions, and lectures widely to physician groups as well as corporate and community audiences. Dr. Hassell is co-author of the popular diet and lifestyle guide, *Good Food, Great Medicine*, now in its third edition.

Miles Hassell MD

**Providence St. Vincent Medical Center
9155 SW Barnes Road, Suite 302
Portland, Oregon 97225**

Dr. Hassell schedules patients Monday through Wednesday; urgent needs can be accommodated on Thursday. Office hours are generally 9am to 4:30pm with lunch from noon to 1pm. Please note that we are closed on Fridays. For urgent matters, the doctor can be paged by calling our office.

About the practice

- We're a patient-centered internal medicine practice combining evidence-based conventional treatments with lifestyle medicine, and always with the goal of improving *overall* health. Using both of these approaches provides the tools to more effectively help patients take control of their health, minimize medications, and reduce their risk factors. Dr. Hassell educates patients on lifestyle choices and a whole food Mediterranean diet model based on the best evidence from current medical literature.
- To keep your care as personal and accessible as possible, we answer our phones directly and offer same day visits to patients with urgent issues.
- Dr. Hassell pursues aggressive risk factor management for heart disease, stroke, type 2 diabetes, & dementia. Where possible, the goal is not just to control, but to reverse type 2 diabetes.
- Reducing the side effects of cancer treatment is a special interest of Dr. Hassell's, as well as working with patients to minimize the risk of cancer or its recurrence.
- Resources include the third edition (2014) of *Good Food, Great Medicine* (by Dr. Hassell and his sister Mea Hassell), a Mediterranean diet and lifestyle guide featuring 14 simple risk reduction steps for heart disease, stroke, type 2 diabetes, insulin resistance, and weight loss, as well as cancer and cancer survivorship. There are also inspiring success stories, helpful menu plans, 185 easy-to-follow recipes with clear directions and everyday ingredients, and tips for practical day-to-day living, shopping, and transitioning to whole foods. (For more information, as well as sample recipes and shopping list, click the [cookbook](#) tab at goodfoodgreatmedicine.com.)

Frequently asked questions

- **How does Dr. Hassell approach patient care?**
Dr. Hassell specializes in the diagnosis and care of medically complex patients. He uses mainstream investigation and treatment plans as well as evidence-based nutrition and lifestyle therapies. He encourages patients to be very closely involved in their care. Initial visits are one hour and follow-up visits 30–60 minutes.
- **What can I expect at my first appointment?**
Your first appointment will include a review of personal and family history and current symptoms, a review of previous laboratory or imaging results, a physical exam, and recommendations for future tests and treatments. We may also consult with your other treating physicians.
- **If I already have a primary care doctor, can I see Dr. Hassell for a consultation?**
Yes. A consultation addresses a particular set of issues, evaluates a difficult medical problem, or offers a second opinion. It does not replace the role of your primary care physician (PCP). We are happy to work closely with your PCP, if requested. In some situations, a telephone consultation is a reasonable alternative to an office visit.

What patients are saying:

"I am a classic example of what you are trying to help folks avoid. Double bypass at 34. Stent at 50. Now at 56 diagnosed with type 2 diabetes. Began Mediterranean-style diet and ramped up the exercise. Have lost 33 pounds and three-month blood numbers were great!"

"I'm just thankful that Miles kept telling me the truth, and kept believing the time would come when I would listen."

"You changed my whole eating perspective with your evidence-based common sense focus on health rather than weight and the concept of taking control of my own health."

Practical resources

- **One-year Health Transformation Program**
For stubborn health challenges like type 2 diabetes, excess weight, heart disease, and cancer survivorship, this personalized one-year patient-doctor partnership is designed to deliver a sustainable evidence-based action plan with aggressive risk factor management, dietary counseling, and follow-up based on individual needs. The goal is disease reversal, medication reduction, and a better long-term quality of life.
- **Speaking events**
Physician, corporate, and community audiences appreciate Dr. Hassell's entertaining blend of medical science, passion for good food, humor, common sense, and insights from 20 years of medical practice. He breaks down current research into practical concepts to inspire lasting change. (Call our office for scheduling details.)

Sky Lakes Medical Center, Klamath Falls:

"Your lecture broke all attendance records and we continue to hear positive reviews about it."

Clackamas County Dept. of Employee Services:

"Thanks again for the outstanding presentation – we're still talking about it. You made an impact."

Perioperative Nurses Conference:

"Your talk scared the bajeebies right out of me and I am motivated to turn my lifestyle around."

St. Charles Health System, Bend: *"Great to have stats to back up recommendations. Would love more talks like this – please come back!"*
